Additional information:

- The modules have been evaluated according to IEC/TR 62778 and the Lamp classification Group for Blue Light Hazard is Risk Group 1 Unlimited for modules having generation of CoB “4” or “5”, Risk Group 2 for modules having generation of CoB “6”, “7” when are used at maximum rated currents. These Generation 6, 7 modules are classified as Risk Group 1 if they are used according to the maximum currents listed below:

- For modules having generation of CoB “4” or “5” with CCT > 4000 K the customer can increase the rated currents (for example 1500 mA for Type 1211) up to the rated currents of modules having CCT ≤ 4000 K (2400 mA for Type 1211). In this case the photobiological hazard shall be additionally evaluated in the final product.
- The insulation between active parts of LED CoB and accessible conductive parts (metal mounting surface) is tested for basic insulation related to 50 Vdc for CoB Types 1202, 1202s, 1203, 1204s, 1204 Gen 7 and all CoBs provided with holders having Field hh in the product key of variant series = “PI”, 150 Vdc for CoB Types 1204, 1205, 1206, 1208, 1211, 1216 provided with holders having Field hh in the product key of variant series = “DL” or blank and 200 Vdc for CoB Types 1204 Gen 6, 1205, 1206, 1208, 1211, 1216 provided with holder having Field hh in the product key of variant series = “ZP” or “ZPw”.

Maximum 4 CoBs can be placed in series configuration for CoB Types 1204 Gen 6, 1205, 1208, 1211, 1216 provided with holder having Field hh in the product key of variant series = “ZP” or “ZPw”. No series configuration can be used for CoB Types 1202, 1202s, 1203, 1204s, 1204 Gen 7 and all CoBs provided with holders having Field hh in the product key of variant series = “PI”.
- Creepage and clearance distances on the overall LED module (LED CoB + LED Holder) shall be evaluated on the final product.
- LED Holders have been evaluated as integral component according to IEC/EN 60838-1and IEC/EN 60838-2-2:.
- M3 fixing screws for LED Holders shall be used. The fasters used to secure the module to the mounting surface must be tightened with a torque between 0,4 and 0,6 Nm.
- The modules can be supplied only by electronic LED controlgears separately approved according to IEC/EN 61347-2-13 and protected against output short-circuit and overload.
- The customer is obligated to add an appropriated cooling system to the LED module in order to not exceed tc value. Temperature test shall be performed on the final product to verify the effectiveness of this cooling system.
