## Switch Commissioning Procedure

# Switch Commissioning Procedure

for PTM215Z EnOcean module – Dual Rocker Four Button Switch

Figure 1 - Outer appearance of PTM215Z module

This switch contains a PTM215Z EnOcean module internally as shown beside. For commissioning this switch into a group, the cover need not be removed and you may choose to work with any one of the four buttons on the switch.

To be able to add this switch to a group, ensure that the group is open. Opening of a ZigBee group is possible using EasyAir IR app with either “**Create group**” or “**Add to Group**” options. Once this is done, please follow the steps given below:

1. Choose any of the four buttons, press and hold it for 10s
  - If you see that the luminaire blinks, then you have successfully commissioned the switch and you may proceed to step 2. Otherwise repeat step 1 with other buttons on the switch until the luminaires send a feedback in form of blinking. Then proceed to step 2
2. After getting the luminaire feedback, close the group using EasyAir IR app with “**Close group**” option. Now the switch is successfully commissioned and added to the group.

**Note:** The above procedure also holds for ZigBee channel change. If you change the channel using the IR app, then you have to perform the switch commissioning procedure again.
